THUNDERWORD

June 2015

Its June, Have you had your T-Bird Out Yet!

If you have not had the opportunity to get the T-Bird out yet, here are some suggestions that you might want to consider. Today is the 22nd of May 2015 in just 14 days the 60th Anniversary of the T-Bird will be celebrated at the All Ford Carlisle Nationals from the 5th to the 7th of June, You better sign up now or you will miss one of the biggest events of T-Bird cars and Clubs all across this country.

Then if you miss that you can still catch some of the glamour on the 13th of June up in Pompton Plains, New Jersey at one of the best shows on the east coast. The All T-Bird NJTA Show from 9 am to 3 pm. These folks do a real bang up job in putting on this show.

Hey I am still not done yet. Then you have your own LVTC Nazareth Days Show. Starting with the planning picnic on July 11 at 4 pm picnic and planning session and then we are seeing a movie. The following weekend the on July 18 at 9 am is our own LVTC Show. Looking forward to seeing many Lehigh Valley members out to help out. And don't forget, we are asking each of you to bring a basket of

about \$25.00 value for our basket raffle. This has been a big hit the past two years. Lets out do those two years with the biggest one yet. Now you ask what to have in them, it could be car, related it could be games or puzzles, It could be cooking ideas, it could be beauty things for the ladies. Those are just a few things I came up with just writing this, I am sure that all of you can come up with many more idea's than I did.

And if those are not enough, next is the one show that was born and bred right here in the LEHIGH VALLEY, DAS AWKSCHT FESCHT which means THE AUGUST FESTIVAL, just in case you are not Pennsylvania Dutch. Three days of Cars Cars Cars. Now fortunately if you have not registered yet you still have until midnight, July 1 2015 to get your registration in. It is \$15.00 per car and cars must be 25 years or older. You can get the registration on-line. Now there are 5 events to take your car to and have a good time with fellow car people especially if they own THUNDERBIRDS !!!!

Birthdays

President's Message

Hello Fellow Lehigh Valley Thunderbird Club Members!

June is finally here and warmer weather is abundant. The Jordan United Church of Christ Car Show went well despite the morning drizzle! Approximately 30 to 35 cars showed up but left at various times during the day. Pictures of some of the cars are shown later in this edition of THUNDERWORD. I used some "New Math" and donated Fifty Dollars to the Church. Karen was very appreciative. The Flea Market and Craft Show was fairly busy all day and of course their food stand was also very busy.

The following Day about 16 Thunderbirds showed up at Wind Gap. Not too bad considering it was supposed to rain. All toll, the show had 270 pre-registered cars show with 40 no-shows. Tony did not have the Day of Show registration count yet when I spoke to him. Again, another good show and a lot of fun with our members who participated. A special thanks to Dwayne and Roger Behler for bringing and sharing their pop-up canopy, to allow us some shade!

June will be another fun month! It starts off with our General Meeting at the Superior Restaurant on Tuesday evening, June 2nd, followed by All Ford Nationals at Carlisle, June 5th to 7th! And then one of my favorite shows, The All Thunderbird Show hosted by the North Jersey Thunderbird Association! So, if you have not been able to get out yet, there is a lot of choices in June!

Hope to see you soon,

***Stay Safe, Cool and Healthy,
Vince***

A Message from the Board

Well members here it is 60 years of Thunderbirds better known as the ALL FORD NATIONALS to be held in Carlisle Friday June 5th to Sunday June 7th 2015 registration is now open. This editor has been told that there are more T-Birds registered than ever before. Hope to see as many LVTC members there as possible.

Because of the large number of people who are registered LVTC and ITC are asking for everyone to please wear your name badges. If you don't have a name badge please let me know as soon as possible so that we can get you one before Carlisle.

The Officers and Board of Directors would like to take this chance to welcome Andre and Joanne Fredette, Wayne and Virginia Schaffer and Dan and Anna Mohry as new members. Please if you see these new members at any of our meetings or shows please make them feel welcome.

Don't Forget next month is our annual NAZARETH DAYS SHOW

Come celebrate the 60th Anniversary of the THUNDERBIRD!

Jordan United Church of Christ

Saturday May 14, 2015 was the Jordan United Church of Christ Car Show and Flea Market. Left the house about 7:45 and got on 309 / 78 and headed north, I wasn't on the road 30 seconds and here comes the rain. So I say to myself, self, do we go on or do we go home. I answered myself and said it's wet now just go on and see what happens.

So I got there and there is one other T-Bird Alan Miller. So I sat in the car until it stopped and then made my way up the hill. Alan was waiting for me at the top under the overhang by the snack bar. Since I didn't eat anything at home bought a Sausage, Egg and Cheese Sandwich and a Coffee. So we stood there and I ate my sandwich and drank my coffee and Alan finished his coffee. Pretty soon Vince and Dennis got there then the Engles' and the Millers then the Shafer's and Mike Souders. So we had 11 members from the LVTC.

There were some other cars a Corvette, 55 Ford, a Buick, a Ford Wagon, 54 Chev, 14 Challenger. The day turned out pretty nice and very warm.

1977 Ford Country Squire Ghost Buster Edition

Thanks to all the LVTC members
who came out for this show

True Spoke Wire Wheel Story

Dear Mr. Hollenbach and fellow Thunderbird Owners,

I read with interest the excellent article you wrote for the *Thunderbird Script*, January/February 2015 issue.

Truespoke Wire Wheel Company was founded in 1974 and we have been a provider of Thunderbird wire wheels for decades. My wife and I own a 1958 Thunderbird which is equipped with wire wheels as well. The problems you drew attention to are reported to us from time-to-time. I would like to respond to your important points raised as follows:

- A) When it comes to having inner-tubes fail repeatedly, there are a number of reasons why this occurs. The things we look out for are:
- 1) **Inspection tags** inside your tires. Nearly every collector-type whitewall tire we have seen is delivered from the manufacturer with small, paper-like tags glued inside the interior of the tire. I have personally found as many as 6 of them in a single tire. These tags behave like sand paper and become brittle enough to puncture the inner-tube. This problem is difficult to trouble-shoot if the tire technician is unaware of this potential cause. The tags are not easily removed and some technicians remove them with a grinder while others use a hair dryer to heat them up and take them off. The entire tag must be taken out. Do not leave any remnants or overlook any.
 - 2) **Tire mold marks**. Some tires have sharp edges inside of them left from the tire mold. These can damage an inner-tube. Also look out for any retained pieces of rubber or foreign material inside the tire.
 - 3) **Improper installation by the tire technician**. Some installers simply lack the experience to properly install inner-tubes. We have seen the tubes get pinched during installation, leading to failure. Avoid big-box type stores for tire and tube installation on wire wheels. These busy tire stores simply won't take the time generally to properly mount a tire on a wire wheel. Find a tire shop where the installer has a gray beard or bald head and has significant experience dealing with wire wheel installations. Each year it gets harder and harder to find a knowledgeable technician. Don't let a technician with zero experience even touch your wire wheels.
 - 4) **Chaffing around the valve stem**. Some rubber valve stems can be damaged by rough edges and contact with the valve stem hole of the wheel. This rough edge can destroy a valve stem. Make sure the edges are smooth and that your valve stem is not too fat whereby it rubs on the valve stem hole.
 - 5) **Sharp metal edges on the nipples or the wheel itself**. When we build our Thunderbird wheels, we grind the nipples down smooth and remove all sharp edges. We then apply a smooth layer of a 2-stage Dow Corning material that is very rugged, similar to truck bed liner material. The liner is then ground smooth. No flap or other protective liner is necessary. The tube will be safe due to these precautions.
 - 6) When you purchase wire wheels, new or used, you should **feel all interior surfaces** to make sure there are no sharp edges. If you discover any, remove them or they will puncture your inner tube.
 - 7) In a Thunderbird style wire wheel, the spokes are located near the front edge of the rim. This is referred to as a "**lip-lace**" or "**bead-lace**". This style of wheel should always be used with the correct size inner-tube. Some owners are able to run this style wheel as tubeless but in nearly all cases, eventually, the bead of the tire will grind through the liner and allow air to leak through the nipples. Use radial type inner-tubes with radial tires and bias-ply tubes with bias-ply tires.

Regarding the other problems Mr. Hollenbach raised in his article, I would respectfully point out:

- 8) **Plumber's tape or electrical tape should never be used** when inner-tubes are installed. These materials become brittle as a result of the 200+ degree temperatures that are experienced with a wire wheel assembly during use. The tape can degrade and form sharp edges that will pierce the inner-tubes and lead to failures. If you have these materials in your wheels, you should have them removed if you are running inner-tubes. If you feel you require a liner, you should obtain a proper "flap" to shield the inner-tube. Our website also tells how to build up a liner using 100% pure silicone.
- 9) **Regarding spinner caps**, our wheels use steel and our chrome does not chip unless it is handled improperly by the user. Most of the chips we have seen on caps and wheels are due to the owner scraping the wheel or cap when improperly trying to remove or install the cap. I have enclosed our instructions for installing and removing hubcaps.
- 10) **Regarding rusty wheels**, I would point out that wire wheels simply require more maintenance than a hub cap or a Cragar S/S that would look totally foreign to a classic Thunderbird. Wire wheels cannot be left wet and must be dried thoroughly after washing or other moisture condition. We recommend using an air hose, shop vacuum or even a leaf blower to thoroughly dry off your wheels after they become wet. If your car sits for longer periods of time, applying a thin coat of WD-40 is also helpful in fending off the tin worm. You are not doomed automatically to have rusty wheels and broken spokes if you properly care for your wheels. These maintenance steps are explained on our website FAQ section.

We have served hundreds of Thunderbird owners over the years and a gallery of photographs can be seen of our customers and their wonderful cars on this link: <http://www.hobbycar.com/Thunderbird-Car-Show.html>

We also have a number of frequently asked questions that we have addressed on this link: <http://www.hobbycar.com/FAQ.html> including some of the questions you have raised.

In conclusion, before you give up on wire wheels, speak with one of the fine wheel builders that provide Thunderbird wire wheels. Some of the problems you are facing could be simple fixes. Please let me know if you discover any inspection tags inside your tires and do not hesitate to email us with any other questions.

We are always happy to answer any wire wheel or tire related questions from our fellow Thunderbird enthusiasts. The extra effort in maintaining your wheels and following accurate advice can lead to years of added beauty and enjoyment in your Thunderbird experience. Respectfully,

Lehigh Valley Thunderbird Club

Membership application fee is \$30.00 . Please make check payable to LVTC. Membership is considered family, including children as long as the child or children are in school or under the age of 19. If the applicant is under 19, membership must be in a parent or guardian's name until 19 years of age. Two pictures are required when making application to the LVTC club. Attach pictures on the other side at the bottom.

Please mail your completed application form and check for to:

Technical “Stuff”

BRAKES

(IF YOU WANT TO STOP SAFE)

The whole thing started last fall when I needed new brakes of the shoe type.

So I looked around on line and found new shoe brakes at ROCK AUTO, for \$10.00 a pair at that price I bought two pair.

Well I had them installed and they immediately started to squeal unmercifully, so back to my technician and he said that the drums should be cut. So we pulled the wheels and measured the drums and they were already oversized. Well by now the weather is starting to really turn cold so I put the car away for the winter, and that is where it stayed until this April.

Well now another culprit enters the scene, it is called a CRUISE-O-MATIC TRANSMISSION. I was going to have this rebuilt last spring but something else needed to be done so the tranny had to wait. Well this year was the time for the trans to have it's turn and it turned out rather well except for the fact that the parts for the trans are no longer available so he had to use parts from a MERCO-O-MATIC and after the rebuild I have to use Mercon- Dexron instead of Type – F Trans Fluid. The transmission works flawlessly and the bird has never run better since I have it.

Back to the brakes, well I hunted on-line for the drums I needed for the Bird and all I came across was drums that are 11 .03125 X 2.50 no matter where I looked Mac's, Rock Auto, Dearborn Classics, JC Whitney, Larry's Mustang & T-bird, Dennis Carpenter. So naturally I thought that was the only size of drums that are available. Plus they were only \$70.00 per. So I ordered them they got here I painted them then took them to my technician who proceeded to put them on the car well he didn't get real far when he found out that the drums I bought where way too small to fit over my brake shoes which happen to be 3.00 instead of 2.50.

So I called Pat Wilson T-Bird parts and asked what size the drums that he stocked are and said wait a second so he measured them and told me that they were 3.00 so I made a quick trip to Fredon, NJ even though they were \$130.00 per. Now comes the real trick when my Technician put the new drums on and I took the car out for a drive, it chattered uncontrollably, I thought the car was going to shake apart. So I took it back the next day and he took the new drums and put them on a brake drum lathe and proceeded to cut 0.00010 off them and afterwards the car stops like a dream. I just could not believe that little bit of run out would make the car act so badly.

So just a little word of advice before you buy on-line do a quick check on what is on your car before you order, you won't have to go through the problems I did.

Tom Hollenbach
